## Enabling iOS devices to use the LSUHSC Wi-Fi network

- 1) <u>Contact the Library</u> to have the necessary configuration file sent to you
- 2) The file must be received through an iOS mail account; webmail will not work
- 3) The message will have the following attachment at the bottom; tap on it to begin the installation:

4) You will be prompted to enter your username and password; the username needs to be prefixed with lsumc-master\ and then your LSUHSC userid; enter your LSUHSC password in at the next screen; this step can be skipped at this time (by tapping "Next" on the two screens)

Cancel	Enter Username	flext	Cancel	Enter Password	Next
Enter you	ur usemame for the WiFi network "L	SUHSC	Enter your p	bassword for the WiFi network "L	SUHSC*
Isumc-mas	ster\userid	0			0
	Requested by the "LSU-SC2" profile			Requested by the "LSUHSC2" profile	

5) If successful, you should see a screen stating the profile was installed successfully. With this file installed, you should be able to log on to the LSUHSC Wi-Fi network. If you did not enter your LSUHSC userid in the preceding step, you will be prompted to enter it (remember to prefix it with lsumc-master\), and you will be asked to provide your LSUHSC password. Now you should be connected!
